Computer Engineer with analytical mind, leadership and business vocation. I combine engineering practices, technical knowledge and management skills to build products and services providing maximum value. I live on the border where technology meets business and I enjoy facilitating understanding between them both.

Experience

- 2020–present **Head of Commercial Technology Zara.com, Inditex, A Coruña.**
Head of the Zara.com technology team in charge of commercial management tools and projects and initiatives of this nature.
- 2018–2020 **Business Product Owner at Zara.com Fulfillment, Inditex, A Coruña.**
As the Business Product Owner of Zara.com Fulfillment area, I'm in charge of the technology team that designs, creates and supports products and services to manage our logistics facilities worldwide.
- 2017–2018 **Project Manager, Inditex, A Coruña.**
Manager and and coordinador of Stock Integration project, a milestone in the omnichannel stock management of the company that allows physical stores to offer their stock online and participate fulfilling e-commerce orders.
- 2013–2017 **Business Analyst, Inditex, A Coruña.**
Member of Zara.com expansion department. Analysis and design of systems integrations with several logistics providers, both fulfillment and transport. Planning and coordination of development teams on projects with external providers. Supervision of IT support team, technical training to business teams and involvement in international projects with stays in America, Asia and several European countries.
- 2013 **Full Stack Developer, Tecnom, A Coruña.**
Development of web applications as a Full Stack Engineer for a well-known multinational company using technologies such as J2EE, Hibernate, Spring, JavaScript, jQuery, JSP, Backbone.js.
- 2012 **University Department Internship, University of A Coruña, A Coruña.**
Several system administration tasks accomplished for the Information Technology and Communications Department. Installing, configuring and securing a Windows Server 2008 machine with web server (Apache + PHP), DBMS (MySQL), SSH, email (Exchange) and Subversion repositories.

Education

- 2005 – 2012 **Computer Engineering**, *University of A Coruña*, A Coruña.
Final thesis consisting of the development of a web application by using Java J2EE technology and JavaScript, qualified with 9.5 out of 10.
- 2011 – 2012 **Erasmus Exchange**, *Chalmers University of Technology*, Göteborg (Sweden).
Several master level courses passed during this stay in the Swedish city of Göteborg, most of them focused on software design and analysis. Special Distinction obtained in the course *Network Security*.
